Police Benevolent Association  
 Law Enforcement Torch Run for Special Olympics (State Committee Member)  
 United States Police Canine Association Region 15

**K9 Course of Study:**

The course of study for Narcotic Detection was to introduce the K-9 to the Scents of Marijuana, Cocaine, Heroin, XTC, and Methamphetamine. The K-9 was able to find these narcotic substances as a result of the intense training received. All of the "hides" for the K-9, after initial imprinting, were in locations unknown to this handler and K9.

The training did consist in the team being involved in over 200 searches for the above listed substances. A positive indication by the K-9 scratching, biting, or barking was given on the searches. Masking agents such as dog food, liquid soap, bacon, turkey, parmesan cheese, coffee, duct tape, chicken bones, liverwurst, etc, were used to distract the K-9. However, these agents did not distract K-9 from making an indication.

During training, specialized training was received from the following: Red Bank Veterinary Hospital and DEA.

Subsequent training was given with K-9 for the Detection of odor of a controlled dangerous substance on currency. K-9 Certification of Detection of Narcotic Tainted Currency is available on Video Tape.
